**Bottom left:** Arched traditional picket style shown in Mahogany with luxury "silver vein" caps.

**Right:** Lattice top privacy style shown in Mahogany with luxury "red vein" caps.

## Nature and technology in perfect harmony...

**highwood**<sup>®</sup> fence combines stylish, natural beauty with the very latest in outdoor materials technology. The result is quite simply, a marriage of the most realistic wood-look of any synthetic fence and ultra low maintenance. **highwood**<sup>®</sup> material can be found at the world's largest theme parks and is the preferred outdoor synthetic wood (used in applications ranging from fence to furniture and boardwalks). If you demand the very best for your home, there really is no comparison:

- ◆ **DEEP, RICH, WOOD-GRAIN COLORS to fit any setting**  
With 3 standard and 9 custom colors, our dark welcoming shades can't be found in other synthetics. Our color stability, over years of weathering, is the best in the business.
- ◆ **ULTRA low maintenance**  
Ever stop to count up the time and expense of maintaining a wood fence over its relatively short lifetime? Compare the "one-time" cost of **highwood**<sup>®</sup> fence and an occasional cleaning with hot soapy water. Relax and enjoy the weekend!
- ◆ **MORE STYLES than any other premium fence range**  
Because we manufacture so many sizes of synthetic lumber, **highwood**<sup>®</sup> material can be used for privacy fence, picket fence or ranch-rail\*\*
- ◆ **highwood**<sup>®</sup> material IS NOT A COMPOSITE  
Therefore **highwood**<sup>®</sup> fence contains no wood fiber and will never fall victim to rotting, mildew, mold or termites.
- ◆ **SOLID profiles offer durability and peace of mind**  
Beauty is not just skin deep...the product is not hollow\*\*\* and the color is not a thin veneer. **highwood**<sup>®</sup> synthetic lumber can be cut, drilled, screwed and nailed just like real wood!

\* designer colors are not typically stocked by **highwood**<sup>®</sup> fence dealers and may require minimum orders – please ask for details.

\*\* ask your **highwood**<sup>®</sup> fence dealer for more information on the styles that are available locally or visit us at [www.highwood-usa.com](http://www.highwood-usa.com).

\*\*\* Only the fence post is hollow – and that has approximately 5/8" thick walls to deliver industry leading strength.

Whether you are surrounding your backyard with privacy style fence or defining your front lawns with pickets, **highwood**<sup>®</sup> fence has got you covered. With an unmistakable style and sophistication, your home is sure to stand out from the crowd.

For commercial applications **highwood**<sup>®</sup> fence offers elegant landscaping that makes the right impression – and as the virtually maintenance free alternative, your property continues to look great year after year.

**Top:** “5+1” privacy style fence shown in Teak with luxury “silver vein” post caps.

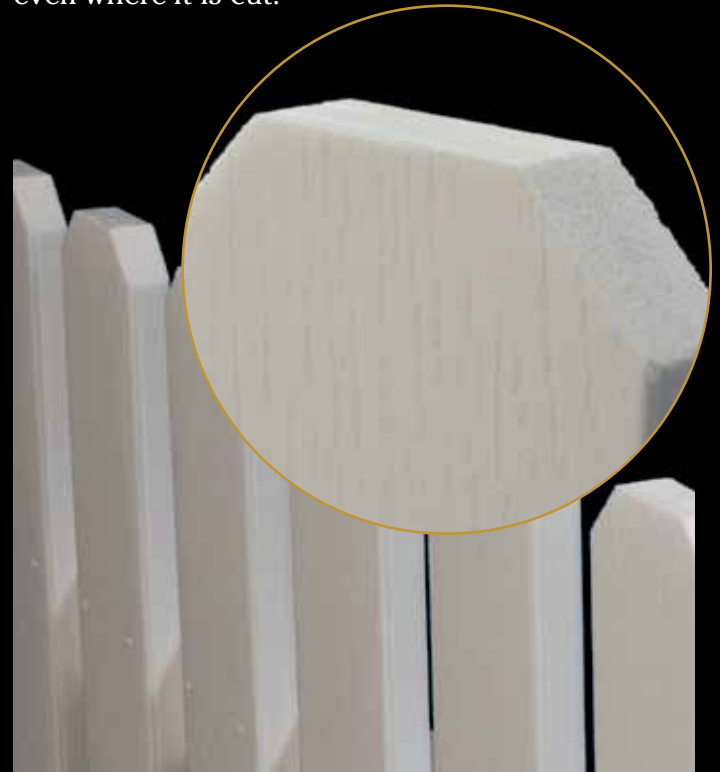

**Left:** Commercial application of highwood Cordovan color rails integrated into stucco walls.

**Top right:** Scalloped flat-top picket style shown in White.

# Perfect picket fences

With low sheen, a textured finish and the ability to shape the picket top into any decorative style, **highwood**® makes the perfect picket fence and it will never need to be painted or stained. In white or wood-grain colors you will see the grain right through the product – and no water absorption even where it is cut!

## **highwood**® fence – nothing comes close

# A smart investment in your home...

In both the short and the long term, **highwood**<sup>®</sup> fence adds value to your home and quality to your lifestyle. Choosing a fence for your property is a significant financial decision and, once installed, isn't easy to change... so why cut-corners? Why compromise?

By choosing **highwood**<sup>®</sup> fence you are assured of quality product and service... and can rest easy knowing that you just significantly improved the "curb-appeal" of your home.

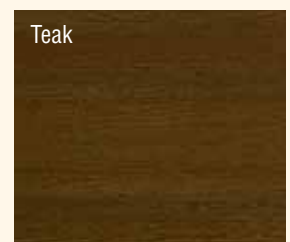

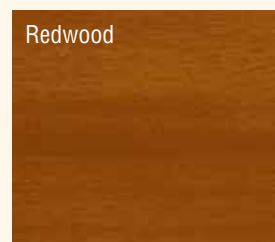

*Premium "New England" style caps to match the three standard fence colors and compliment custom colors.*

*Luxury metallic-effect caps. Black base with silver vein/red vein upper finish.*

*Highwood custom/designer colors.*

*Highwood fence "standard colors" are Mahogany, Redwood and Teak.*

**Left:** Privacy fence shown in Redwood with premium Hawthorne color caps.

**Top above:** "5+1" privacy style fence shown in Mahogany.

**Bottom above:** Privacy style fence in a commercial application. Shown in Coffee with premium Sandalwood color caps.

## Timeless beauty – whatever the application

**highwood**<sup>®</sup> fence is proudly and exclusively manufactured in the United States by Highwood USA LLC. As a dedicated team, we take great pride in delivering the best premium fence for you and your home. Our synthetic lumber has been used in hot-tubs, outdoor furniture and gazebos over the past 20 years. The early products still look great today and we have continued to improve the look and performance of the material over those years. Highwood USA LLC manufactures a broad range of dimensional lumber, which means that if you can dream it... you can build it with **highwood**<sup>®</sup> synthetic wood!
